

CloudCommand

One-stop administration and provisioning for the cloud services you offer

Solution Overview

Efficiency means profitability and *CloudCommand gives you all of the tools you need to manage all of your cloud services from a single console.* Enter your customers, domains and users one time and literally check a box to turn any service on or off at any time.

JetStream is your single source for robust and comprehensive email security and compliance services, including email hosting, encryption, archiving, and continuity, as well as file sync (coming soon). JetStream allows you to manage all of these services from a single web console, CloudCommand, with single sign-on and an extremely simple user interface. JetStream is sold exclusively through the Channel.

Why CloudCommand?

Channel partners generally have at least two, if not three, four or five different vendors that they work with to deliver all of the solutions available through CloudCommand. *By using CloudCommand you can increase your efficiency tremendously, and therefore your margins by working with a single vendor* to provide all of the email security and file protection services that your end users need.

JetStream offers a fully integrated platform in CloudCommand that allows you to enter your customers, domains and users one time and enable services with the click of a button.
